GOOD JUST KEEPS

GETTING BETTER!

THE NEW VANTOURER 2027 IS HERE.

When expertise meets feedback, a van becomes a VANTourer. A vehicle that not only inspires but also thinks for itself. For everyone who wants more than just mobility on the road. This is already evident in the standard model: well-thought-out, high-quality, and noticeably superior to what the competition offers straight from the factory. Anyone who compares will quickly see how much of what others offer is only available on their list of optional extras.

New for 2027: the vario bathroom 2.0

The completely newly developed and patent-pending vario bathroom 2.0 makes its world debut in the 600 D and 630 L models. Its sliding door mechanism separates the living area, transforming the bathroom into a separate, enclosed space that did not exist before. At the same time, switching between a side bathroom and a room-style bathroom becomes even more flexible, creating noticeably greater freedom of movement. The other layouts retain the tried-and-tested, classic vario bathroom concept.

At the heart of every VANTourer remain the 4-zone kitchen and the intelligent storage concept – practical and fitted as standard. The kitchen divides cooking, washing up, refrigeration and work into clearly separate areas, including an energy-saving compressor fridge (90 l) with dual-opening doors, accessible from both inside and outside. In addition, the features that make the VANTourer unique remain: the optional pop-up roof with panoramic view, the optional fold-down bed in all layouts and the connection for the rear outdoor shower (optional).

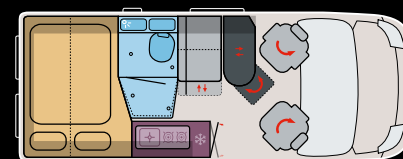

Greater safety as standard

In line with the new EU safety regulation GSR II, numerous driver assistance and safety systems are now fitted as standard, including emergency braking assist, lane departure warning, intelligent speed assist and driver drowsiness warning, at no extra cost.

Visually, the 2027 VANTourer impresses with a light-coloured interior in white décor and elegant Malaga Smoke accents in an urban loft style. Under the bonnet: state-of-the-art technology based on the latest FIAT Ducato with up to 180 PS (EURO 6E).

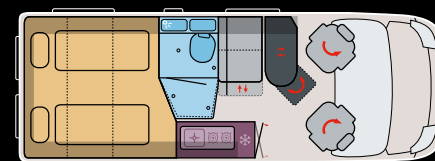

Whether it's a city break, a holiday in the countryside or everyday life – the VANTourer 2027 is ready when you are.

MORE VAN. MORE TOUR. VANTOURER!

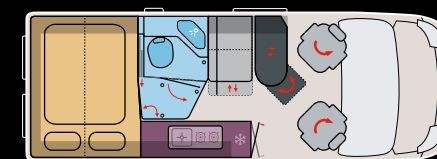

540 D – the city VANTourer:

- + short, agile and manoeuvrable
- + transverse bed at 5.41 m

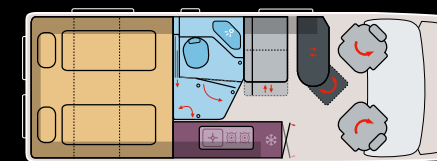

600 L – the comfort VANTourer:

- + comfortable classic for couples
- + long beds on 5.99 m

600 D – the all-round VANTourer:

- + compact, modern and flexible
- + transverse bed at 5.99 m

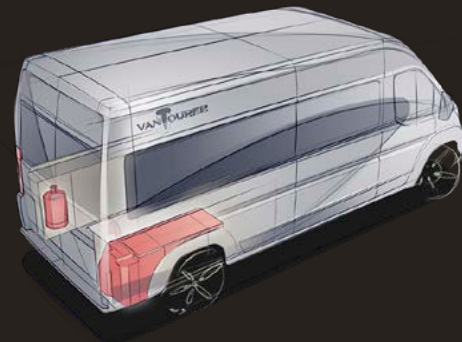

630 L – the maxi VANTourer:

- + more space for more holidays
- + long beds on 6.36 m

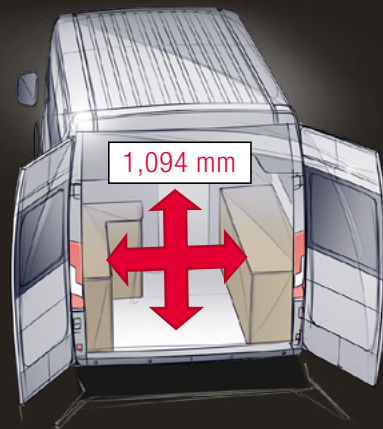

All 2027
VANTourer models
are GSR II-compliant.

UP TO 40 %

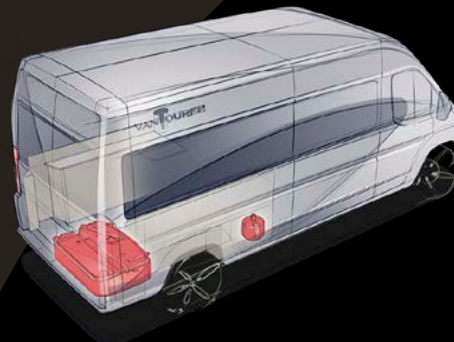

MORE REAR STORAGE SPACE

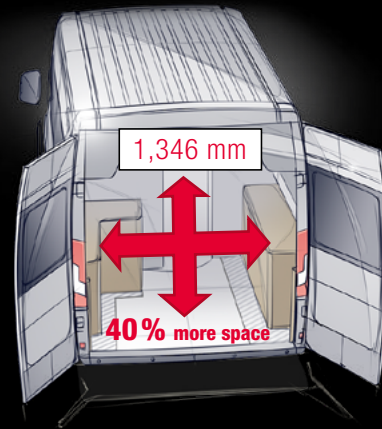

Was everything better in the good old days? Not at all! The gas cylinder and water tank used to occupy a lot of space that it was nigh-on impossible to take anything bulky with you.

The large lateral rear storage boxes used to jut far out into the loading area, meaning there was little space available for loading. What a waste of space!

But the VANTourer has the solution: the fresh water tank is now located under the vehicle. Thanks to the compact Truma diesel heating system, instead of the 11 kg gas cylinder, only a small gas cylinder (Campingaz type R 907 2.75 kg) is now carried, which is only needed for cooking.

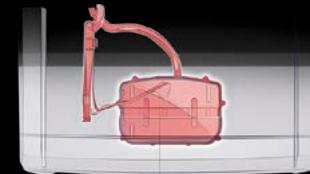

With the new, expanded design concept, the storage boxes are significantly narrower and, depending on the layout, the rear loading area is up to 40 % bigger. Even bicycles can fit in the VANTourer diagonally.

UNDERFLOOR FRESH WATER TANK

Space miracle with added stability. Yes, you've seen correctly: The fresh water tank is located under the vehicle. This not only creates more storage space in the interior, but also improves the driving stability of the already manoeuvrable VANTourer.

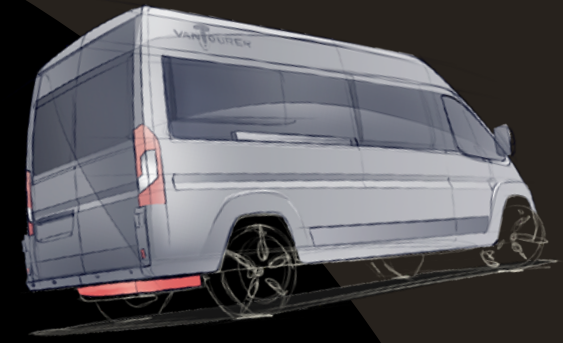

With a capacity of 100 litres, the tank is generously dimensioned – and thanks to special insulation, it is optimally protected against the cold and environmental influences.

The fresh water tank is insulated.

Low centre of gravity for more stability when driving.

THE HEATING SYSTEM THAT CREATES STORAGE SPACE

More space. More comfort. More freedom. The Truma Combi D 6 diesel heating is not only a real storage space saver, but also a pleasant foot warmer – and above all a guarantee of independence. Forget the hassle of heavy 11 kg gas cylinders: No swapping, no lugging, no searching for a suitable sales outlet. Instead, you can simply fill up with diesel at any petrol station at any time – conveniently and flexibly. The particularly quiet heating is installed centrally under the dinette in the living area – exactly where heat is needed. Hot air vents in the living, sleeping and rear areas distribute the warm air in a targeted and efficient manner. This allows you to enjoy maximum self-sufficiency and cosy warmth – on the road and in everyday life.

DIESEL HEATING 2.0

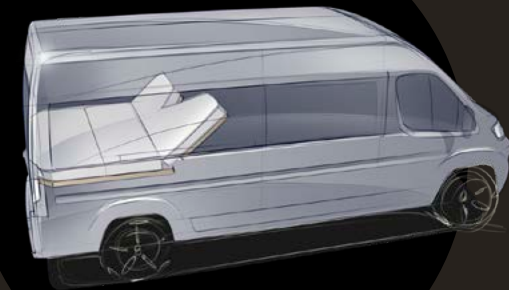

More heat. Less noise. Maximum efficiency. Thanks to the boost function, the Truma Combi D 6 diesel heating system now brings the interior up to a cosy temperature even faster on cold days. The optimised night mode ensures quiet nights: a reduced voltage supply to the fuel pump, finer gradation of the burner output and a reduced speed of the combustion air fan make the heater particularly quiet – and reduce coking at the same time. The on-board battery is also protected – thanks to temperature-controlled pre-heating, an energy-saving diesel pump and the elimination of a separate exhaust fan.

SMART

REAR STORAGE CONCEPT

Van professionals know the situation: the bike is stowed on the bike rack, but during the journey it rains, the mud splashes, the bike is completely dirty without a protective cover – setting off on a bike tour with the first rays of sunshine is difficult, and securing the bikes on the bike racks at the rear door is annoying. But the thought of bike thieves can also cause restless nights if the bike has to stay outside. Beat the weather and thieves with the VANTourer and stow up to four bikes in the vehicle (depending on size and layout).

The large rear storage compartment also offers plenty of space for moving boxes or other bulky everyday items – the VANTourer is a real all-rounder.

VANTourer connoisseurs will recognise it immediately: on the left you can see the optional variant with a separate fold-down bed. But what about the models with a fixed bed?

One movement – two options: Simply fold up the bed section to create valuable storage space underneath – for a bicycle, for example. Or you can use the folded-up bed section to transform the bed into a comfortable sofa bed.

By the way: A fold-down bed in the rear is available as an option in all layouts, replacing the fixed bed. An additional bed can also be installed underneath. This allows you to combine maximum flexibility with real sleeping comfort.

MOBILE COMFORT

The VANTourer 2027 welcomes you with a bright, friendly ambience, white décor and elegant applications in Malaga Smoke. The cleverly designed 4-zone kitchen not only provides more functionality, but also opens up an open line of sight to the rear – for a noticeably airier feeling of space. Despite its compact exterior dimensions, the interior surprises with its spaciousness and well thought-out design.

The captain's chairs can be turned into a cosy seating area in a few simple steps, while the bench seat combines comfort and style with the easy-care fabric/artificial leather combination. The cleverly designed table adapts flexibly: when folded down, it ensures maximum freedom of movement, and when swivelled out, it provides a comfortable table surface.

1 Here you sit really well. The fleece-reinforced upholstery ensures noticeable comfort – on the swivelling captain's chairs as well as on the dinette bench seat. The high-quality feel of the upholstery emphasises the inviting atmosphere of the VANTourer. The dinette bench seat can be easily pushed apart without any complicated conversion of the head restraints and thus provides even more seating space – even a child seat can be easily attached. The height of the headrests can be adjusted.

2 For even more seating space, the VANTourer can also be optionally equipped with two sliding individual seats with Isofix child safety locks.

1 Smart: The hob and sink have separate, hinged covers that flexibly extend the work area as required. This creates a generous preparation area even in a compact space, before the meal is prepared safely and quickly on the 2-burner gas hob with piezo igniter.

2 Modern look: With plenty of storage space and height-adjustable shelves, the curved wall units keep everything organised. The modern, backlit storage compartment with Plexiglas insert offers additional space for espresso cups or small kitchen utensils and also gives the interior a stylish, contemporary look.

3 Practical down to the smallest detail: The side pull-out cabinet with integrated waste bin and paper roll holder complements the well thought-out storage space concept (600 D/630 L). An additional compartment at the bottom provides space for small items – ideal for sponges, bin liners or spice jars.

4-ZONE KITCHEN TO ENJOY

From the marketplace straight into the van: The VANTourer kitchen turns cooking on the road into a real experience, thanks to its thoroughly thought-out 4-zone design. Whether it's fresh pasta, the first coffee in the morning or a quick snack in between: Every handle is in place, every storage space is cleverly utilised. Robust plastic thick edges ensure suitability for everyday use.

The 4-zone kitchen follows a clear principle: short distances, maximum convenience and intelligent use of space – for cooking experiences just like at home, only with a better view.

Zone 1: Cooling

At the front of the kitchen block is the rotated and energy-saving 90-litre compressor refrigerator with double hinges, which can be opened flexibly from the inside and outside. This means that cool drinks can be accessed directly from the camping chair even when the side door is open. Ideal for warm summer days and relaxed moments of enjoyment in the open air.

Zone 2: Preparation

The worktop offers plenty of space for preparation – to the left and right of the hob/sink combination, whose hinged glass covers extend the area if required.

Zone 3: Cooking

The 2-burner gas hob with offset hobs is ergonomically positioned directly by the window or sliding door and, in combination with the sink, offers maximum flexibility – perfect for fresh meals with the best view.

Zone 4: Storage

In the lower section of the kitchen unit, soft-close drawers on roller bearings provide generous storage space for cutlery, cooking utensils and pots and pans. In the 600 D and 630 L, a side pull-out with integrated waste bin and paper roll holder completes the storage space concept. Above this, a spacious wall unit with height-adjustable shelves keeps things tidy, while the recessed compartments below are ideal for spices and small bottles.

4 Clever cooling: The Dometic fridge with double hinges can be opened both from the inside and the outside. This means that cool drinks or snacks are always to hand – even directly from the camping chair.

630 L – fold-down bed & frame windows (optional)

600 D – frame windows & rear side windows (optional)

SLEEPING SPACE FOR SWEET DREAMS

The bedroom offers maximum comfort – not only for sleeping, but also for reading, dreaming and relaxing. The bevelled, deep-drawn wall units provide headroom and offer plenty of space. The breathable fabric covering of the walls supports a pleasant room climate and counteracts the formation of condensation.

1 Just stay in bed for the evening – why not? After all, it's a holiday. In a cosy bedroom with a view, every moment is a pleasure. Whether reading, dreaming or switching off – energy-saving LED strips create the perfect atmosphere for relaxing hours.

2 Practical: Flat LED reading lights with integrated USB charging sockets are positioned under the wall units.

3 Everything has been thought of: A light switch, a protected 230 V socket and a 12 V socket are located in the rear – easily accessible in the two corners on the left and right. Ideal for external devices – right where you need them.

LOUNGE TO RELAX

Flexibility is the keyword – after all, who wants to be tied down when it comes to living and sleeping when the living space is so wonderfully flexible? Convert your bed into a cosy lounge in just a few simple steps and watch a good film or open the rear doors wide and enjoy the wonderful view.

1 The spacious sleeping area offers comfortable space for two people and ensures restful sleep with its sophisticated design and high-quality materials – ideal for relaxing nights.

2 Raise the headboard and let your gaze wander through your VANTourer panel van.

3 Fold up the foot area and enjoy the view from the open VANTourer rear doors.

VARIO BATHROOM 2.0:

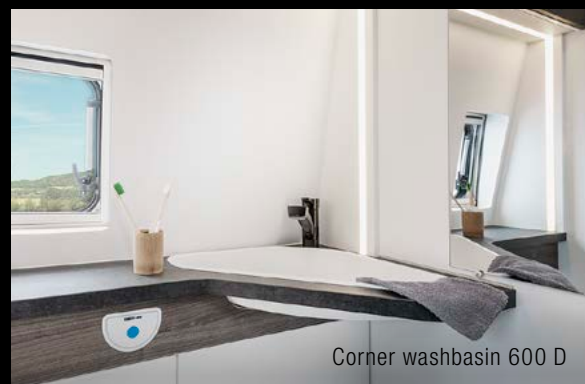

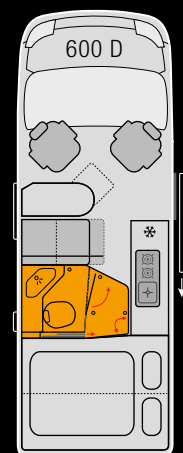

One bathroom, two possibilities: The vario bathroom has always been a clever solution that combines a side-entry and a walk-in bathroom in a flexible design. Compact for everyday use, spacious for showering.

In the 600 D and 630 L models, the new **vario bathroom 2.0** takes things a decisive step further: it separates the living area and turns the bathroom into a room in its own right. This creates a second, enclosed area in the blink of an eye – something that didn't exist before. Switching between the two layouts is easier than ever, and the walk-in bathroom offers more space than ever before. This room divider is so innovative that a patent application has been filed for the vario bathroom 2.0.

At the same time, the rear sliding door can also be used on its own to create a sheltered, separate sleeping area. This transforms an open-plan layout into two separate zones: the living area at the front and a secluded retreat at the back.

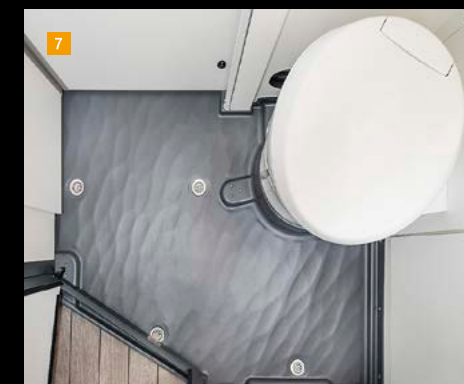

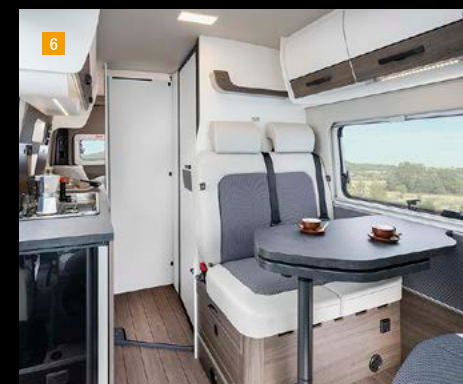

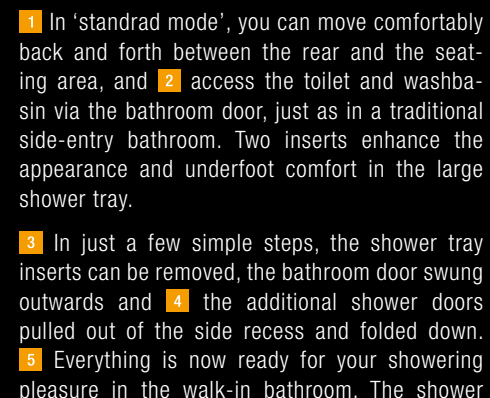

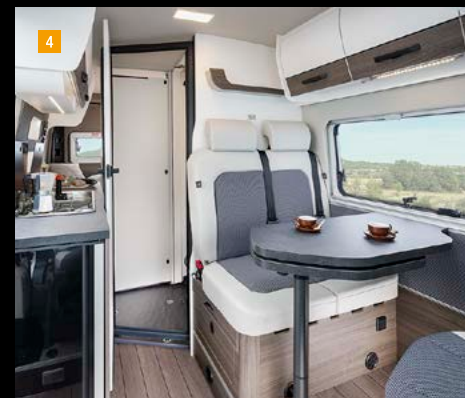

The washbasin with mirror, the Thetford toilet and practical storage compartments prove their worth in everyday use. Those seeking even greater independence can, if they wish, swap the Thetford cassette toilet for the sustainable Thetford separation toilet at their dealer's, reducing the use of chemicals whilst on the move.

The toilet window provides fresh air, allows water vapour to escape quickly and, in combination with the pull-out tap, even offers the option of a refreshing outdoor shower.

Corner washbasin 600 D

WE KNOW EVERY TRICK IN THE BOOK

Advantages
of the Thetford
separation toilet

Why choose when you can have both?

The classic vario bathroom in the VANTourer 540 D and 600 L combines a side-entry and walk-in bathroom in a flexible design – compact for everyday use, spacious for showering.

Not only is there plenty of space in the vario bathroom for a relaxing shower, but the modern washbasin is also a real winner. The toilet window provides fresh air: It allows steam to escape quickly and – in combination with the pull-out tap – even offers the option of a refreshing outdoor shower.

The classic Thetford cassette toilet can be swapped for the sustainable Thetford separation toilet in both layouts on request at your VANTourer dealer – for greater independence and fewer chemicals.

Straight washbasin
in the 540 D and 600 L

THE CLASSIC VARIO BATHROOM:

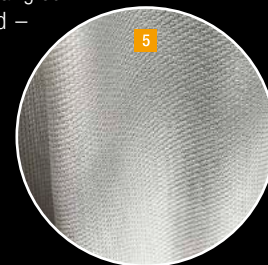

SIMPLY TWO IN ONE

1 In "standard" mode you can easily walk back and forth between rear and cockpit and **2** use the toilet and the larger basin as in the usual compact bathroom. An insert in the additional shower tray improves the look and feeling. The edges are now flattened for more sure footedness.

3 The shower tray insert is removed with a simple hand movement, the angled shower wall is swung forward and **4** a shower curtain is pulled around – everything is ready for your showering pleasure in the bathroom.

5 The shower curtain is made from a high-tech coated fabric that effectively repels water. Built-in fibreglass rods ensure that it always retains its shape.

VANTOURER 2027

THE ALLROUNDER WITH FOLD-DOWN BED (OPTIONAL)

Would you like a little more space? The rear of the VANTourer not only offers storage space – but real freedom. All four layouts can be optionally equipped with the new generation of infinitely adjustable fold-down beds. Unlike classic fold-down beds, which disappear completely under the ceiling and are therefore no longer usable, the sleeping area in the VANTourer remains fully usable depending on the position. Valuable holiday companions such as a high-quality bike can be stored safely and cleanly underneath. So you can enjoy a restful night's sleep – and a good feeling.

1 Travelling with four? No problem. Simply raise the fold-down bed – and there's space for a fixed bed underneath (optional).

2 Room to move upwards: Even with the fold-down bed set half-way up, there is plenty of space underneath.

3 When fully lowered, it is just as comfortable to lie and sleep in as in the bedroom at home.

Space for everything that life brings. Whether it's a bike tour, family adventure or bulk shopping – the VANTourer adapts to your everyday life just as flexibly as your desire to travel. The fixed bed can be folded up in a few simple steps to create generous storage space in the rear. And with the optional fold-down bed, the area underneath can be used at any time – even when the sleeping accommodation is set up. Everything from a mountain bike to a dog crate can be stored here – and remains safely stowed away.

i More details on options and storage space

VANTOURER 2027

Four bikes, two adults, two children – all safely stowed away: The compact 540 D with optional fold-down bed and pop-up roof offers generous storage space and full comfort for active family adventures.

Are you planning to move? No problem. The VANTourer is not only a real space miracle on holiday, but also in everyday life. Maximum storage space in every situation.

REAR STORAGE ROOM – FULL OF POSSIBILITIES

Clean arrival: The outdoor shower in the rear (optional) is the perfect helper for active campers – ideal for quickly cleaning your dog, bike or shoes after an adventure. So the dirt stays outside ...

... and the vehicle clean inside. The hinged connection box is located within easy reach at the rear right of the rear compartment. The flexible shower hose with shower head is quick and easy to fit.

Want more loading space? No problem. Simply fold up the foot or head end and use the space created to suit your needs.

Clever: The bed can be easily folded up and locked into place thanks to the locking hinge at the foot end.

A safe place: A modern dog box under the optional fold-down bed offers a protected place for your four-legged friend – comfortable and well thought-out.

VANTOURER FOR 4

THE INNOVATIVE POP-UP ROOF (OPTIONAL)

Sleep like kings: With the optional pop-up roof, two more people can enjoy a cosy sleeping area with a fantastic view.

Compared to conventional GRP constructions, the innovative LFI design offers exceptional dimensional stability and excellent insulation. Unlike GRP, where fibreglass mats are laminated with resin in open moulds, the LFI roof is manufactured in a closed moulding process – for consistently high quality and maximum strength.

Particular emphasis was placed on aerodynamic design for optimum handling. The elegant lines of the roof blend harmoniously into the rear section.

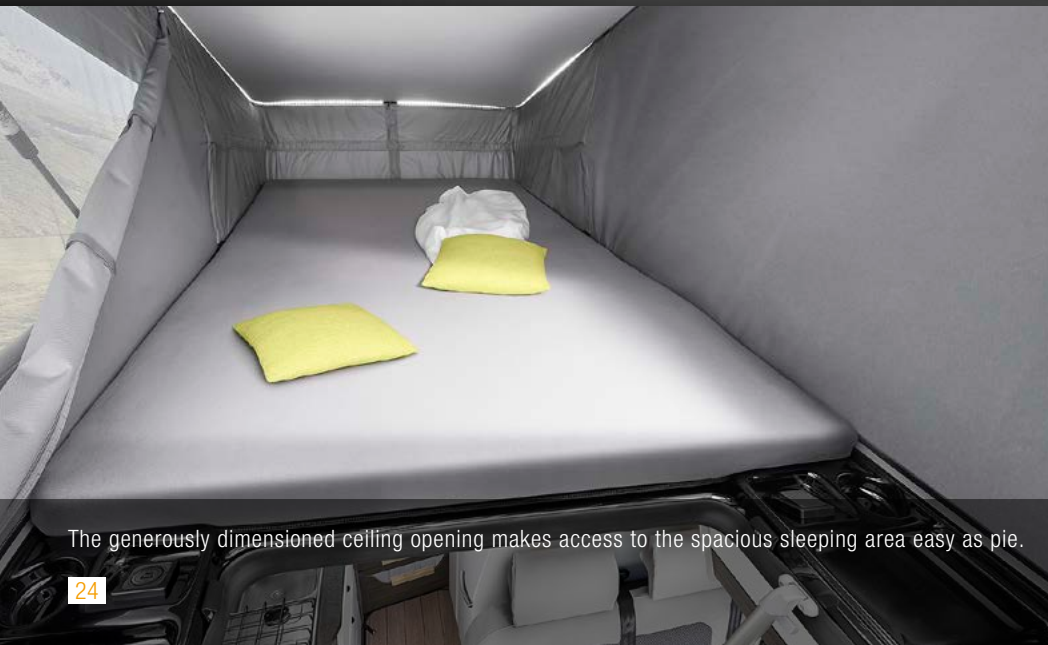

THE VANTOURER ROOF PACKAGE (OPTIONAL):

- pop-up roof (white or lava grey), incl. mosquito net and blackout
- aerodynamic lines for optimised driving behaviour
- ladder for easy ascent
- comfort bed with reading lights
- roof hatch incl. flyscreen and blackout
- LED lighting in the entire pop-up roof
- practical storage compartments with USB charging sockets and bottle holder
- air outlet in the pop-up roof
- huge lying surface (200 x 130 cm)

A dream floor in just a few steps. Simply set up the lightweight aluminium ladder, fold up the pop-up roof – and your comfortable second bedroom is ready to go. Thanks to the generous height and sleeping area, you can enjoy restful nights in the best comfort.

Two windows, integrated reading spots and an LED light strip provide atmospheric lighting, while an air vent ensures a pleasant climate even when the walls are closed.

And for unforgettable nights under the stars, the outer tarpaulin can be partially opened, complete with blackout and mosquito net – for the perfect mix of fresh air and views.

The generously dimensioned ceiling opening makes access to the spacious sleeping area easy as pie.

Next to the roof hatch, there are practical shelves on both sides, including cup holder and USB charging sockets.

The ladder is installed in just a few steps.

540 D

1 Additional warm air vents

2 Wall pocket storage

3 USB charging sockets (type A & C) at the shelf

4 Truma diesel heating under the seat bench

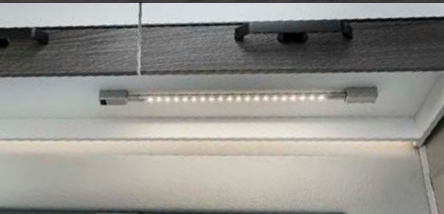

5 Fresh water tank cleaning hatch

6 LED interior lighting saves electricity

7 Entry step with electronic deployment function

22 Dimmable LED light bar system

21 High-quality upholstery in a bicolour look

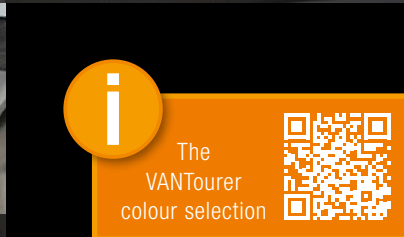

20 Leather steering wheel and gear knob, steering wheel remote control

19 Jack in recessed compartment below the table

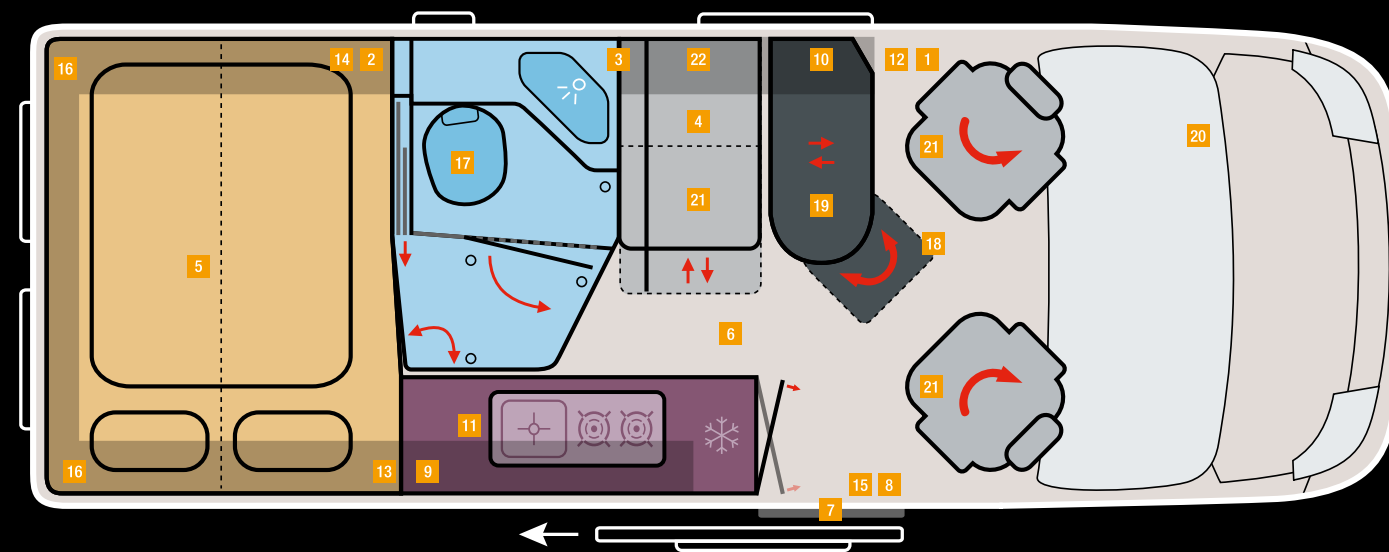

18 Table with swivelling extension
