Category Campervans

Off-road, on-road, en route to the next adventure. Discovering pulsating metropolises, recharging your batteries in the mountains, surfing on the Atlantic coast – with the VANTourer Urban, your imagination is the limit.

In the variants BASE, COMFORT and PRIME, the modern all-day vehicle accompanies you on every road – whether paved or not.

From a spacious passenger car for moving house and bulk shopping to a reliable partner for active holidays or weekend trips – its compact dimensions, optional all-wheel drive and flexible equipment make the new VANTourer Urban a true all-rounder. Anytime. Anywhere.

COMPARABLY BETTER.

ANYTIME.ANYWHERE.

THE NEW VANTOURER URBAN 2022 IS THERE.

COSY-SMART-LIVING.

A companion as flexible as your life. The swivelling pilot seats and the rear bench seats are grouped around the folding table, which can not only be removed but also flexibly moved in its position thanks to the rail system. The bench seat can not only be removed to create more storage space, but can also be converted into a cosy additional bed thanks to the lying surface extension. The roof of the VANTourer Urban not only serves as a double bed with a breathtaking view, but can also be folded up if necessary to create additional seating and living space.

ANYTIME.ANYWHERE.

THE NEW VANTOURER URBAN 2022 IS THERE.

INSIDE-OUT-KITCHEN.

ANYTIME.ANYWHERE.

THE NEW VANTOURER URBAN 2022 IS THERE.

A world of delights is waiting to be discovered by you. Why not cook directly outside?

In just a few easy steps, you can simply remove the multifunctional kitchen of the VANTourer Urban through the sliding door on the side and convert it into a mobile outdoor kitchen. Then all you have to do is decide which side of the VANTourer is the chocolate side for you, because thanks to the exterior sockets you can set up the kitchen on either the right or the left side of the vehicle. Since the gas bottle is in the van and not in the kitchen block, it can be moved easily by two people.

The additional 12-volt, water and gas connections on the right-hand, rear side enable undisturbed culinary enjoyment directly in nature – of course you can also connect your own gas barbecue or an electric cool box there.

The two-burner hob – with practical glass cover for more work surface – transforms the kitchenette into a multifunctional cooking refuge. The stainless steel-look sink and the shelves for spices, cups and other utensils always ensure a clean and tidy appearance. The compact 30-litre refrigerator is easy to reach and has a digital thermostat with temperature display.

OPEN-MINDED-ROOF.

ANYTIME.ANYWHERE.

THE NEW VANTOURER URBAN 2022 IS THERE.

Equipped for everything – the flexible all-day vehicle offers enough storage space for small and large sports equipment. After an action-packed day, relax in your cosy double bed and enjoy the view through the side windows. Two reading spots with USB connection not only meet the ever-increasing demand for electricity, but also provide a cosy atmosphere in your mobile retreat.

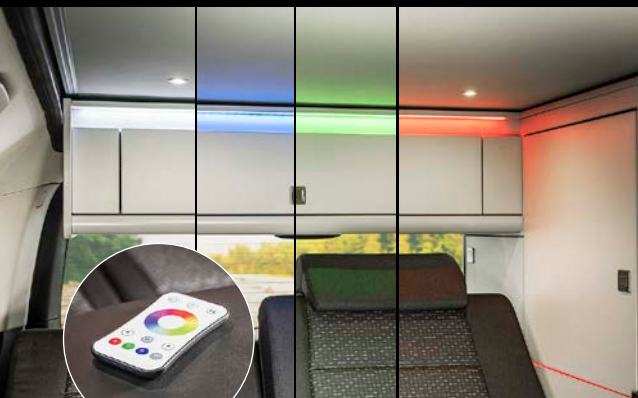

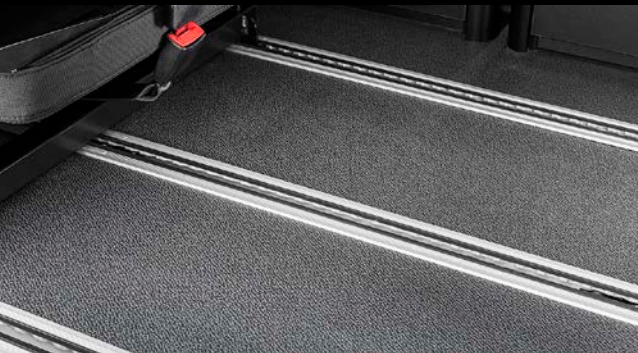

PERFECT-LITTLE-THINGS.

ANYTIME.ANYWHERE.

THE NEW VANTOURER URBAN 2022 IS THERE.

It's the little things that make holidays great. Practical and atmospheric details such as the dimmable RGB ambient light incl. remote control above the wall units and under the worktop of the kitchenette. On the side wall directly next to the seating group you will find a 12-volt and a 230-volt socket, the on-board control system and the Webasto auxiliary heating control. The integrated rail system allows you to position the bench seat individually according to your wishes. Thanks to numerous optional assistance systems such as lane departure warning, blind spot warning and active brake and distance assist, the cockpit in outstanding Mercedes-Benz quality makes even the journey to your holiday destination a pleasure.

The VANTourer Urban is packed with surprising conveniences, such as the tabletop with metal insert on which corresponding glasses adhere magnetically. The filler neck of the 25-litre fresh water underfloor tank is integrated into the step and thus particularly easy to reach. The gas supply is ensured with a bottle of Campingaz R 907 in the custom-fit cabinet and is easy to reach via the tailgate. Of course, you can also “fire up” the Urban with shore power instead of the service battery – the corresponding DEFA cable is already included as standard.

VANTOURER URBAN 2022 TECHNICAL GUIDELINES

Subject to changes, errors, factory technical adjustments and printing errors. Status: 15.03.2022. The VANTourer Urban from EuroCaravaning has a 24-month warranty. Dimensions and weights are within possible tolerances of +/-5 % due to the use of natural raw materials. By attachments, modifications or installations in unauthorised workshops you endanger your safety and risk the loss of the general operating licence and the VANTourer warranty. Therefore, only have repairs or retrofits carried out by an authorised VANTourer dealer and insist on original VANTourer extras. Subsequent conversions and installations, as far as they are technically possible, require additional assembly and material costs. In individual cases, special request combinations may be mutually excluded. We reserve the right to make technical changes in design, colour and equipment, insofar as this serves technical progress.

The content corresponds to the status at the time of printing in march 2022. The price list is valid from 15.03.2022 for the model year 2022. Previous price lists lose their validity. All prices in Euro, incl. the currently applicable statutory VAT and are subject to adjustment in the event of tax rate changes. Some of the illustrations in the VANTourer price list show optional extras that are available at extra cost. Errors and misprints excepted. The water supply system corresponds at least to the state of the art 03/2009 (Directive 2002/72/EC).

When ordering options that replace components from the equipment lines, these package components are not supplied in addition.

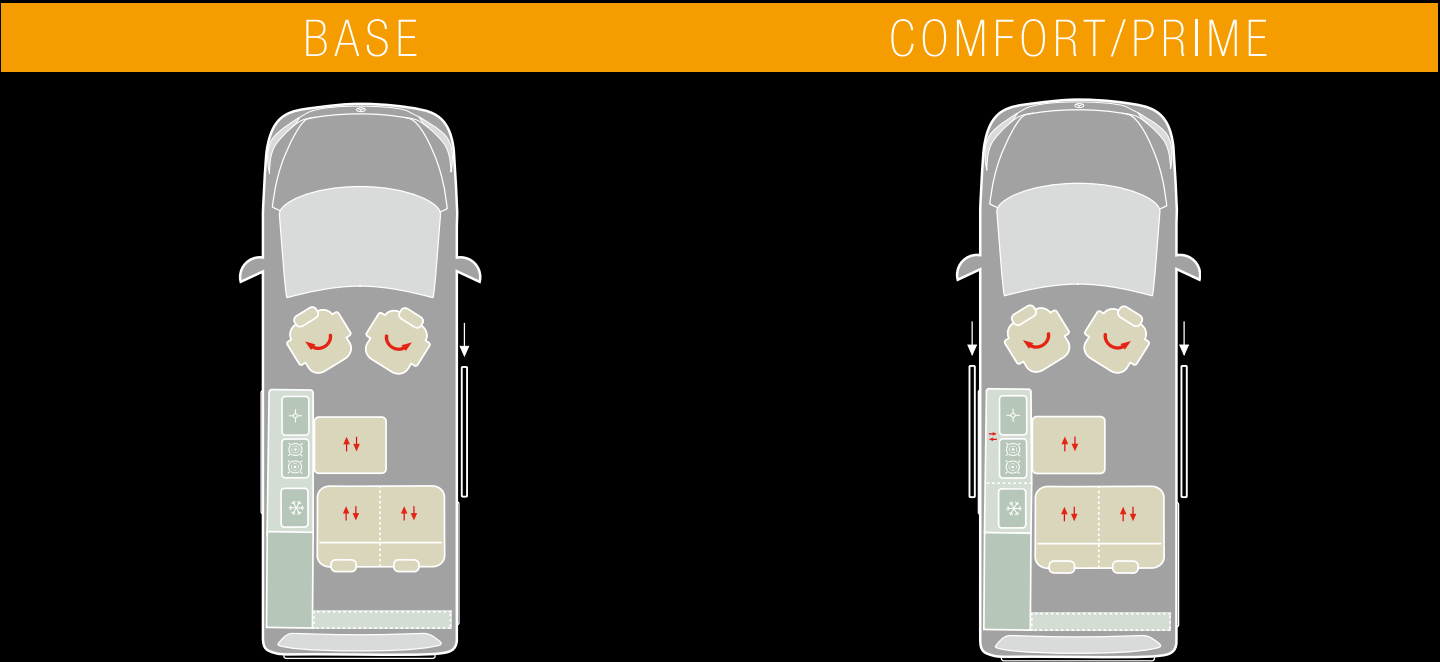

* Explanation of the weight specifications for your VANTourer: The legislator has stipulated that the weight of a motorhome is to be indicated as the "mass in running order" and the "technically permissible maximum laden mass" (Directive 92/21 EEC):

The mass in running order is defined as: Mass of the empty vehicle (incl. on-board tools) + fuel tank 90 % full, + 75 kg (driver's weight), + liquid gas bottle 100 % full, + fresh water tank 100 % full, + toilet flush tank 100 % full, + fresh water heater 100 % full = mass in running order.

Example: Mass in running order 2,565 kg, technically permissible maximum laden mass 3,100 kg, maximum load capacity 535 kg.

The mass of the empty vehicle is determined by weighing a vehicle in standard equipment (in the case of the VANTourer already with the extensive standard accessories and the various equipment packages with on-board tools).

Please note that optional extras, accessories and packages may reduce the maximum load capacity of a motorhome due to their influence on the mass of the empty vehicle. As a user of a motorhome, you are obliged not to exceed the "permissible maximum laden mass" and the respective maximum axle loads when driving.

SPACE-FOR-EVERYTHING.

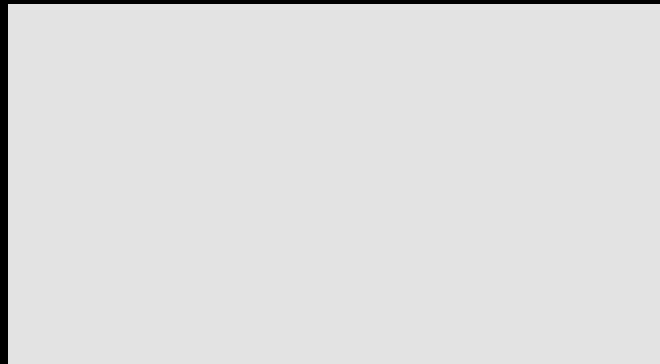

ANYTIME.ANYWHERE.

THE NEW VANTOURER URBAN 2022 IS THERE.

Why not take what you want with you? Because in the VANTourer Urban you have more than enough space for it. Whether you're doing a week's shopping or moving house – the removable rear bench considerably increases the VANTourer's load area. But even in "camping mode", thanks to the overhead cupboards in the rear and integrated into the side wall, as well as the shelves in the multifunctional kitchen, you will find enough storage space for all your holiday comforts.

Any responsibility for deviations in colour, texture or materials is hereby excluded, provided such deviations conform with standard commercial practice. The same applies to technical changes to VANTourer Urban 2022, provided that the product quality remains the same or improves as a result of the changes. We cannot accept any responsibility for errors.

We reserve the right to make changes at any time.
