We charge a standard fee of 1,390.00 for preliminary freight, freight, TÜV, certificate of title and gas test in Germany.  
All prices in Euro. All prices include statutory VAT at the rate of 19 % applicable in Germany and are subject to changes in the tax rate.

*Important note: The seller is legally obliged to apply the VAT rate valid at the time of vehicle delivery (= service provision) to the purchase price. Changes in the VAT rate between the conclusion of the purchase contract and delivery of the vehicle therefore lead to a change in the VAT amount owed by the purchaser and to this extent to a subsequent change in the agreed gross purchase price.*

## TECHNICAL GUIDELINES

Errors, omissions, factory-made technical adaptations and misprints excepted. Status: 15.03.2022. VANTourer vans from EuroCaravaning have a 5-year water ingress guarantee and a 24 month warranty. Due to the use of natural materials, the dimensions and weights may deviate within a range of +/- 5 %. Attachments, retrofittings or installations performed by non-authorised workshops pose a risk to your safety as well as the loss of your general operating license and warranty. Repairs and retrofitting should only be done by authorised VANTourer dealers and insist on VANTourer original extras. Subsequent retrofittings and installations, in case they are technically possible, will require extra assembly and material costs. In individual cases it can lead to mutual exclusion come from special request combinations may be possible, insofar it is conducive to technical progress.

The contents correspond to the status of the version printed in March 2021. The price list is valid from 15 March 2022 for the 2022 model year. Previous price lists are no longer valid. All prices are in euros. The illustrations in the VANTourer price list may show special features that are available at a minimum for an additional price. Errors, omissions, factory-made technical adaptations and misprints excepted. The water supply system corresponds at a minimum to the latest technology as of 03/2009 (Directive 2002/72/EC).

When ordering options that replace components from the equipment lines, these components will not be additionally supplied.

Errors, omissions, factory-made technical adaptations and misprints excepted. Status: 15.03.2022

\* Explanations on the weight information for your VANTourer: The law stipulates that the weight for a motorhome be specified as the "Mass of the vehicle in running order" and the "Maximum authorised laden mass of a vehicle" (Directive 92/21 EEC):

The mass of the vehicle in running order is defined as: Mass of the empty vehicle (incl. tool kit) + Diesel tank 90 % filled, + 75 kg (weight of the driver, + Liquid gas tank 100 % filled, + Freshwater tank 20 % filled, + Toilet flushing tank 100 % filled, + Fresh water heater 100 % filled = Mass in running order

Example: Mass of the vehicle in running order 2,750 kg, Maximum authorised mass 3,500 kg, Maximum laden mass 750 kg

\*\* with maxi chassis 3,000 kg

The mass of the vehicle in running order is determined by weighing a vehicle with standard equipment (the VANTourer already includes comprehensive standard accessories and the package features with on-board tools).

Please note that special features, accessories and packages may reduce the maximum extra loading capacity of a motorhome due to their impact on the mass of the empty vehicle. As the user of a motorhome, you are obligated to comply with the "Maximum authorised laden mass" during operation and the respective maximum axle loads.
